# Contents

## Physics of Fundamental Interactions and Particles 1

**1 Towards a Dark Matter Experiment 1**

1.1 Introduction . . . 1

1.2 The liquid argon detector . . . 1

1.3 Light collection . . . 3

**2 Ultracold Neutrons 7**

2.1 Wall-loss and depolarization of stored UCN . . . 7

2.2 Production of Diamond-like carbon coatings . . . 7

**3 Precision Measurements in Rare Pion Decays 9**

3.1 The $\pi^+ \to e^+\nu_e\gamma$ decay . . . 9

3.2 A precision determination of the $\pi^+ \to e^+\nu$ branching ratio . . . 11

**4 Search for $K\pi$-Atoms 14**

4.1 The $K\pi$ scattering length . . . 14

4.2 The DIRAC II experiment . . . 16

4.3 The aerogel counters . . . 17

**5 Particle Physics at DESY/HERA (H1) 21**

5.1 Electron-proton collisions at a centre of mass energy of 320 GeV - summary . . . 21

5.2 Inner multiwire chamber and vertex trigger . . . 21

5.3 Analysis activities . . . 22

**6 The DØ Experiment: Search for Rare $B_s^0$ Decays 33**

**7 High-precision CP-violation Physics at LHCb 36**

7.1 LHCb experiment . . . 36

7.2 Silicon tracker . . . 37

7.3 Trigger tracker . . . 38

7.4 Silicon sensors . . . 41
7.5 Readout system . . . 41
7.6 Detector simulation and reconstruction software . . . 42
7.7 Physics studies . . . 43
7.8 Summary and outlook . . . 43

**8 Particle Physics with CMS 45**
8.1 B - physics with CMS . . . 45
8.2 Silicon pixel sensors . . . 47
8.3 Readout electronics . . . 51
8.4 Mechanical support structure . . . 51

## Condensed Matter Physics 54

**9 Superconductivity and Magnetism 54**
9.1 Studies of isotope effects in novel superconductors . . . 54
9.2 Studies of pressure effects in novel superconductors . . . 56
9.3 Spectroscopic studies of novel superconductors . . . 57
9.4 Electric field effects in perovskites . . . 62
9.5 New developments in instrumentation . . . 64

**10 Phase Transitions, New Materials and Superconducting Photon Detectors 65**
10.1 Physics of superconducting thin-film nanostructures . . . 65
10.2 Search for resonance phenomena in $\mathrm{TlCuCl_3}$ . . . 67
10.3 Vortex phases in type-II superconductors . . . 69
10.4 Synthesis and characterization of $\mathrm{LaBaNiO_{4-\delta}}$ . . . 70

**11 Surface Physics 71**
11.1 Spin polarization and exchange splitting of the surface states on Ni(111) . . . 73
11.2 Boron nitride nanomeshes on different substrates . . . 74
11.3 *h*-BN and boron nanowires on Mo(110) . . . 76
11.4 Stability of the *h*–BN nanomesh on Rh(111) in aqueous environment . . . 77
11.5 Two-photon photoemission from the *h*-BN nanomesh . . . 78

11.6 A source of spin-polarized electrons: *h*-BN/Ni(111) . . . . . 80
11.7 Corannulene adsorption on $h$-BN/Ni(110) . . . . . 81
11.8 LUMO photoemission lineshape in low-dimensional $C_{60}$ arrays . . . . . 82
11.9 Identifying enantiomers with core level photoelectron spectroscopy: the amino acid cysteine on Au(17 11 9)$^S$ . . . . . 84
11.10 Time-resolved low-energy electron diffraction . . . . . 85

**12 Physics of Biological Systems** **88**
12.1 Structure of individual biological molecules . . . . . 88
12.2 The SIBMAR project . . . . . 91
12.3 The cryogenic LEEPS project . . . . . 91
12.4 Numerical hologram reconstruction . . . . . 93
12.5 Studies on the Conduction Mechanism in a Solid Electrolyte . . . . . 94
12.6 Teaching . . . . . 98

**Infrastructure and Publications** **99**

**13 Mechanical Workshop** **99**

**14 Electronics Workshop** **102**

**15 Publications** **104**
15.1 Research group of Prof. C. Amsler . . . . . 104
15.2 Research group of Prof. H.-W. Fink . . . . . 108
15.3 Research group of Prof. H. Keller . . . . . 109
15.4 Research group of Prof. J. Osterwalder . . . . . 112
15.5 Research group of Prof. A. Schilling . . . . . 116
15.6 Research group of Prof. U. Straumann . . . . . 117
15.7 H1 Publications . . . . . 123
15.8 Research group of Prof. P. Truöl . . . . . 125
